Ariel Barboza

AI/ML Engineering, Asc. Manager | Enterprise AI Strategy | Ontology & Knowledge Graphs | Lockheed Martin
Melbourne, Florida, United States

Summary

I am passionate about leading AI-driven innovation that transforms organizations, accelerates decision-making, and drives strategic growth.

Throughout my career, I have built enterprise-scale AI solutions, led cross-functional engineering teams, and delivered automation initiatives that unlock measurable business value. I specialize in bridging cutting-edge technologies with business strategy to create smarter, more resilient organizations.

I hold an Executive MBA from the University of Florida's Warrington College of Business and a Master of Engineering in Systems Engineering from Cornell University, combining technical depth with executive leadership to drive lasting impact.

Experience

Lockheed Martin
6 years 11 months

AI & Machine Learning Engineering, Associate Manager
November 2025 - Present (5 months)
Melbourne, Florida, United States

Leading AI/ML engineering efforts supporting enterprise modernization and strategic innovation initiatives.

- Provide technical and people leadership for AI-focused engineering teams supporting mission-critical systems.
- Drive the development and alignment of intelligent data solutions that enable scalable automation and informed decision-making across the organization.
- Collaborate with senior leadership and cross-functional stakeholders to shape and execute enterprise AI strategy.

- Establish engineering standards, governance practices, and delivery frameworks to ensure sustainable and secure implementation of advanced technologies.
- Mentor and grow technical talent while fostering a high-performance, execution-focused culture.

Staff Full Stack Software Engineer
June 2024 - November 2025 (1 year 6 months)
Melbourne, FL

Driving enterprise transformation at the intersection of automation and AI within the Automation Center of Excellence.

- Architect and lead developer of AgilePulse AI, an intelligent assistant that processes 88K+ project issues daily to assess risk, enhance predictive KPIs, and safeguard millions in potential delays.
- Release Train Engineer for a team of 50+ developers, delivering 18–22% improvements in velocity across multiple Agile teams.
- Delivered enterprise-wide automation solutions, including an ETL pipeline replacing 500+ manual reports and generating $100K+ in annual savings.
- Mentor and technical coach to 10 developers across 10+ concurrent automation and AI initiatives.
- Championing Agile best practices, executive reporting alignment, and cross-functional product delivery at scale.

Staff Software & Project Engineer
August 2023 - June 2025 (1 year 11 months)
United States

Release Train Engineer and Scrum Master for the Automation Center of Excellence.
- Ensure teams deliver capabilities quickly and efficiently.
- Lead and manage 10 Agile Teams and Release Trains across multiple products.
- Facilitate Scrum Ceremonies, including daily stand-ups, sprint planning, sprint reviews, and retrospectives.
- Facilitate the Agile Release Train planning process, including creating the ART Backlog and Roadmap.
- Identify and manage ART Dependencies and Risks.
- Coach and mentor teams and stakeholders on agile principles and practices.
- Ensure the team is accountable for meeting commitments and for the quality of their work and product.

Senior Project Engineer
July 2022 - August 2023 (1 year 2 months)
Melbourne, Florida, United States

Product Orchestrator and Scrum Master of the Enterprise FOSS team, Secure Infrastructure team and the Metrics, Engagements, Tools & Applications (META) Team.
- Coach teams on agile best practices/holding the team accountable for good agile practices.
- Led and coached Product Owners to improve story writing, feature discovery, and requirements gathering process which resulted in a decrease in time-to-delivery by 20%
- Oversaw 6 successful consecutive release cycles, increasing content by 25%
- Facilitate both internal team and cross-team communication
- Produce defined metrics at the conclusion of every Sprint

Software Engineer, Leadership & Development Program
August 2021 - July 2022 (1 year)
Florida, United States

- Completed and vetted 145 Eye Suite (internal tool) program engagements totaling $11.6 Million in reportable DX business value and 86 Digital Transformation Index program engagements totaling an additional $2.1 Million in reportable DX business value.
- Responsible for working with stakeholders directly in defining requirements for capabilities that are requested, providing back estimates for the work, implementing the requested functionality, and demonstrating the results to stakeholders.
- Initiated 174 different merge requests delivering functionality for different features and bugs to the code base.
- Product Orchestrator and Scrum Master of Lockheed Martin's Software Factory - Enterprise Free and Open Source Software Delivery Team.
- Product Owner and Software Engineer of a Digital Transformation Web Based Tool that automates more than 200 manual tasks.
- Scrum Master of Lockheed Martin's Software Factory - Secure Infrastructure Delivery Team, where story completion ratio was improved by 80% within 3 sprints in role.
- Lead in the creation, architecture and development of a workflow automation tool for internal employees applying to various leadership and development programs. Where DevSecOps will be established in it's design for future engineers to learn this process as they apply and develop themselves within the Leadership Development Programs.

Software Engineer Associate, Leadership & Development Program
January 2020 - August 2021 (1 year 8 months)
Orlando, Florida

Lead application developer of a Django Framework Application that supports Digital Transformation processes automation for over 200 programs.
Lead an Agile Scrum team of 15 developers as a Scrum Master and perform engineering and development changes as a Software Engineer on a project that integrates multiple components supporting full-lifecycle management and sustainment to more than 300,000+ fielded training aids, devices, and simulators. Use Jira, Slack, Postfacto, Git, and Bitbucket to track bugs, features, progress and other tasking.
- Engineered over 220 software solutions using SQL Server Integration Services (SSIS), SQL Server Reporting Services,
Oracle Databases, Microsoft SQL Server, and Tableau.
- Led the transformation of 42 reports to more efficient software architecture resulting in a 40% decrease in DWH load time.
- Enforced Kanban principles as a Scrum Master that resulted in a reduction of failback rate by 20% in less than six weeks.
- Coached new team members in Scrum best practices to decrease the failback rate from 20% to 4.5% in three sprints.
- Established team velocity metrics by incorporating capacity forecasting into sprint planning sessions.
- Resolved a complex communication issue by reshaping team communication via implementing Slack, now the fourth most
used Slack Channel at Lockheed Martin.
- Decreased punt rate by 78% by instituting a time-tracking tool, Jira leading to SOAR RMS-wide recognition.

Software & Systems Engineering Intern
May 2019 - January 2020 (9 months)
Orlando, Florida Area

Worked as a member of an Agile team to maintain and provide support for the software stack, design systems, analyze requirements, integrate and test software as both a Software and Systems Engineer on a development program.
- Developed 90+ software fixes and added functionality to the system using Java/J2EE, SQL, and JavaScript
- Tested the transition and full integration of 35 reports from CSV extraction to SSRS Reporting Services to make the reports more user friendly for the end customer.

- Acted as Project Manager for an intern project to develop a Python – Django Framework Web application on a mobile device using the Systems Engineering Lifecycle.

US Army
19K M1 Armor Crewman
September 2012 - September 2016 (4 years 1 month)
Fort Bliss, Texas

Led, supervised, and served as a member of the M1 Armor unit in offensive and defensive combat operations and supported the staffing, training, and scheduling of soldier development programs for the battalion.
- Volunteered as the President of Better Opportunities for Single Soldiers to improve the morale and welfare of 500+ soldiers
through the implementation of engagement events and programming.
- Led three soldiers in the unit including basic needs, payroll, combat readiness, and training of day-to-day operations.
- Acted as Gunner and Tank Commander with ultimate responsibility for $6.2M in equipment.

Motif, Inc.
IT Help Desk Technician II
January 2011 - May 2012 (1 year 5 months)
Heredia, Costa Rica

Provided IT support for CareerBuilder.com to resolved 70+ employee software applications and hardware issues weekly.
- Authored 45+ knowledge-based articles for CareerBuilder.com's IT department.
- Reduced ticket solving time by 50% during peak hours.

Amazon
IT Helpdesk Technician
December 2009 - April 2011 (1 year 5 months)
Lagunilla, Heredia, Costa Rica

Implemented 100+ hardware and software IT solutions monthly and reported more than 15 bugs via the ticketing system.

Education

Cornell University
Master of Engineering - MEng, Systems Engineering

University of Florida

Master of Business Administration - MBA, Executive Business Administration · (April 2025)

University of Florida

Bachelor of Science - BS, Computer Science

Santa Fe College

Associate of Arts - AA, Computer Science
